EDUCATION

University of Auckland | Auckland, New Zealand

Mar. 2023 - Jul. 2026

BSc majoring in Computer Science & Statistics | GPA: 7.5/9.0

- **Awards:** Certificate of Outstanding Achievement in Object Orientated Programming, Principles of Programming, Introduction to Statistics, Digital Fundamentals

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, HTML, CSS, TypeScript

Tools and Frameworks: Node.js, [React.js](#), Git, XGBoost, FastAPI, Flask, MongoDB, Astro, Sanity, TailwindCSS

RELEVANT EXPERIENCE

Web Development & Consulting Club | TANSA Project

Apr. 2025 - Nov. 2025

Web Developer

- Worked in a team of 10 in an AGILE environment to deliver the webpage for largest socio-cultural club in Auckland (1000+ Members), The Taiwanese and New Zealand Students Association, working in fortnightly sprints.
- Responsible for front-end implementation of meet the team page, as well as adjusting for responsiveness on mobile & different screen sizes to ensure cross-device compatibility.

PROJECTS

HNU Research Unit Website | University Capstone Project

Jun. 2026

- Worked in a team of 6 to deliver a **production** website for the University of Auckland's Human Nutrition Unit (HNU) using Astro, React, Sanity CMS, and Tailwind CSS, following **Agile** methodology with GitHub Projects.
- Integrated Sanity CMS across multiple pages (Studies, Our Team), enabling non-technical staff to manage all page content, images, and links without developer intervention.
- Designed and built the Studies page and dynamic study slug pages from scratch — including interactive dropdown sections, eligibility criteria, schemas, and a "back" navigation flow — giving researchers a way to showcase ongoing clinical trials.

NBA Stats App | Personal Project

Feb. 2026

- Built a full-stack NBA analytics dashboard (**React + FastAPI**) surfacing historical player/team data across 70+ years of NBA history, with live odds integration in progress.
- Allows users to view teams records season on season, player stats season on season, and compare any two players. Working on implementation of integrating probabilities of players hitting x lines in betting odds to the app.

League of Legends Prediction Tool | Personal Project

Mar. 2026

- Built a machine learning model to predict the outcome League of Legends professional matches based entirely on the drafting phase, using a XGBoost Model. Model had no knowledge of team skill or player skill, looking only at Champion composition.
- Achieved 67.7% accuracy on EMEA Winters bracket stage, across 71 games using XGBoost trained on 20,000+ Games and fine tuned on group stage - outperforming random chance by ~18 points with zero team/player skill features.

LEADERSHIP & WORK EXPERIENCE

University of Auckland CompSci Society | Auckland, NZ

Jun. 2024 - Present

Events Team Co-Lead

- Co-lead a team of 7 to plan and execute **15+** annual events, including multiple **100+** attendee events for New Zealand's **largest** Computer Science student society.

JB Hi-Fi | Auckland, NZ

Oct. 2024 - Present

Casual Sales Associate

- Working as a sales associate in a fast-paced commission-based tech sales environment. Consistently outperformed store KPI's by ~20% across ATV, items per sale and customers per hour in a commission-based environment, averaging \$150+ weekly commission.
